https://github.com/devanshi2123

DevOps Enthusiast with an MBA in IT Infrastructure and a B.Sc. in Information Technology. Skilled in Linux, Git, SQL, Python, cloud computing fundamentals, and DevOps concepts including CI/CD, Docker, automation, and infrastructure management. Possess 6 months of experience as a Technical Trainer, delivering technical training in programming and IT subjects, creating educational content, and mentoring students. Adept at learning new technologies quickly and passionate about improving system efficiency, automation, and operational excellence.

WORK EXPERIENCE

Shrestha Sikhsha Education and charitable Trust • AHMEDABAD • 01/2025 - 07/2026

An educational trust engaged in skill development, technical education, and academic support services. Working as a Knowledge Partner with Gandhinagar university to provide quality training, student mentoring, curriculum delivery, and industry-relevant learning experiences.

Trainer • Full-time

- Delivered lectures and practical sessions on programming, databases, and IT-related subjects.
- Prepared course materials, assignments, and assessments for undergraduate students.
- Guided students in academic projects and practical implementations.
- Conducted doubt-solving sessions and provided mentoring support.
- Evaluated student performance and provided constructive feedback to improve learning outcomes.
- Assisted in curriculum delivery and student skill development initiatives.
- Participated in professional development programs and completed training on **Big Data technologies**, gaining knowledge of Hadoop, HDFS, MapReduce, Apache Spark, and distributed data processing concepts.
- Enhanced technical expertise through continuous learning in emerging technologies, including Big Data, cloud computing, and modern IT infrastructure practices.

EDUCATION

MBA IT IN INFRASTRUCTURE • SYMBIOSIS INTERNATIONAL UNIVERSITY (SICSR) 24-26 •
06/2024 - 05/2026

B.S.C IT IN SOFTWARE DEVELOPMENT • GUJARAT UNIVERSITY, AHMEDABAD 21-24 •
06/2021 - 05/2024

SKILLS

- **Technical skills:** Python, Linux, Shell Scripting, Html,CSS,Bootstrap, Django
- **DevOps & CI/CD::** Git & Github, Docker, Jenkins, Ansible, YAML, GitHub Actions (CI/CD), Kubernetes , Helm
- **Cloud & Infrastructure::** AWS (EC2, IAM, VPC, S3, CloudWatch), Terraform, Infrastructure as Code
- **Monitoring & Security::** Prometheus, Grafana, SSH, UFW, Linux Server Hardening
- **Databases:** Mysql, SQL
- **Data Analytics:** Pandas, NumPy, Hadoop, Spark, Power BI
- **Business & Project Tools::** JIRA , Microsoft Project

PROJECTS

CI/CD Pipeline for Portfolio Website | Jenkins, Docker, Terraform, AWS EC2

- Built a Jenkins CI/CD pipeline to containerize and deploy a portfolio website on AWS EC2.
- Automated Docker image builds and publishing to Docker Hub.
- Used Terraform to provision AWS EC2 infrastructure and security configurations.
- Automated deployment from GitHub → Jenkins → Docker Hub → AWS EC2.

- Reduced manual effort through an automated build, push, and deployment workflow.

Kubernetes Application Deployment & Monitoring | Kubernetes, Docker, Helm, Prometheus, Grafana

- Deployed a containerized application on Kubernetes using Deployments and Services.
- Used Helm for configurable and reusable Kubernetes deployments.
- Implemented Prometheus and Grafana for application and cluster monitoring.
- Configured scaling, health checks, rolling updates, and rollback for reliable deployments.

Linux Server Hardening Automation | Bash, Linux, SSH, UFW

- Developed Bash automation to harden and audit Ubuntu Linux servers.
- Automated SSH, UFW firewall, user, password policy, service, and permission checks.
- Implemented security logging and automated audit report generation.
